

Self-retaining with
the TorqDrive shaft

NEW

Designed to Perform

**NEW TorqAlign Screws Bring
Impactful Innovations Together**

- Easy engagement
- Self-retaining
- Self-aligning - no wobble!

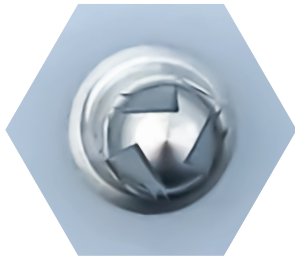

The TorqAlign screw combines optimum design features from the Movable portfolio brands and is compatible with current DT implants and instrumentation.

The Patent-Pending Design of TorqAlign Screws

Self-Retaining
Self-retaining with the
TorqDrive shaft

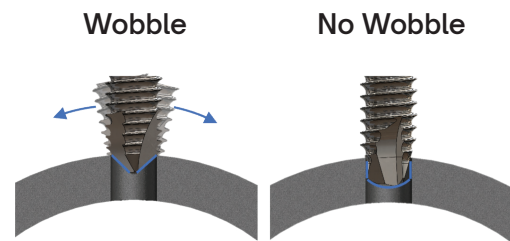

Rounded Tip
Reduce the risk of soft
tissue damage at the
exit point

Easy to Engage
Pilot tip for axial alignment
and sharp cutting flutes
facilitate engagement of the
CIS cortex.

**The enhanced tip of the TorqAlign
Screw is designed to self align!**

The pilot tip provides stability by aligning the
screw axially with the drill hole, and when
combined with the sharp cutting flutes,
eases the engagement of the CIS cortex.
